

Solar Bollard Light LR-CP005

36 LEDs encased in patterned diffuser

Features

- Commercial grade solar lighting
- Requires 10-12 hrs charge before use
- 10-12 hours working time each night
- High quality inbuilt LiFePO4 Battery
- Attractive modern design
- Ideal for illuminating paths and walkways
- Automatic light sensor turns LEDs on and off from Dusk to Dawn operation
- Warranty: 3 years for faulty workmanship or component failure not caused by external means

Specification

- | | |
|--|------------------------------------|
| • Color of lamp: Powdercoat satin grey | • Solar panel: 9V/7W |
| • Charge time: 4-6 hours | • Solar panel size: 150×160mm |
| • CCT: 4000K | • Light sources: 36pcs Bright LEDs |
| • Product size: 1000mm×295mm | • Battery: LiFePO4 Battery |
| • Brightness: Approx/ 350Lumen | • Material: Aluminium Powdercoated |

How does this compare with other light sources?

Familiar examples:

- * A typical 4×D cell battery maglite will emit approx. 70 lumens
- * The average hardware store path light using 2-3 LEDs emits 15-18 lumens
- * A 25W Incandescent globe emits approximately 160 lumens
